Plants, Plagues, and People

I. Course Information

Course term: Fall 2022
Meeting Day/Time: Tuesday (3:00 PM – 3:50 PM) & Thursday (3:00 PM – 4:55 PM)
Location: FIF2316
General Education Designation: Biological Sciences & History

A minimum grade of C is required to earn general education credit. More information on grades and grading policies can be found here:
https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

Instructor
Samuel Martins – sj.martins@ufl.edu
Office: 2413 Fifield Hall
Office hours: Friday, 3:00 – 5:00 PM. Emailing for an appointment will ensure that there will be no waiting time.
Phone: (352) 273-4649

Teaching Assistant (TA)
Malia Fortney: malia.fortney@ufl.edu
Office hours: by appointment

This syllabus is subject to change by the instructor if needed.
Course Description

Plants, Plagues, and People is a biohistory course. Within biology we discuss the origin of life and life diversity and its interactions. We will address how life has evolved and why things are the way they are. Students will be able to reflect upon the environmental factors and life interactions that have been influencing life on Earth since its beginning and how those interactions influence and constrain human activities. Course themes include geologic times, origin of life, first forms of life on Earth, environmental pressures and resource limitations, diseases, and the roles that these factors have played in human civilization up to modern times.

Required & Recommended Course Materials (to purchase/rent)

There is no required text. Selected readings will be distributed in class or provided electronically within the course modules in Canvas.

II. Coursework & Schedule

There will be 12 quizzes, 2 tests, and multiple participation opportunities. The grading scale is built on a point-based system, with “extra credit” points built in.

1. List of Graded Work

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Description</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quiz Scores</td>
<td>12 quizzes at 3 points each (total=36)</td>
<td>30</td>
</tr>
<tr>
<td>Test 1</td>
<td></td>
<td>25</td>
</tr>
<tr>
<td>Test 2</td>
<td></td>
<td>25</td>
</tr>
<tr>
<td>Participation</td>
<td></td>
<td>20</td>
</tr>
<tr>
<td><strong>Total points</strong></td>
<td></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>

A satisfactory grade will be earned with the equivalent of a “C-” grade or better (70-100 points).

Quizzes: Groups with 4 or 3 students will be formed, depending on the number of students. Ideally, we will have groups with 4 students each. Groups will work collaboratively on quizzes and assignments.

In your collaborative quiz groups, you will be responsible for selecting a question theme and creating:

- 1 question based on the Tuesday class
- 1 question based on the Thursday class
- Complete answers to both questions

Even though the two questions can be related, they should not be rephrased to ask the same thing.
Quiz 1 will be provided by the instructor and TA and offer a good example of the types of quality questions you should be creating with your group. Subsequent quizzes will include three questions created by other groups. We will go over all the quiz questions together immediately after the quiz. The TA will grade the quizzes later and add the grades to Canvas. We will have 12 quizzes throughout the course, and the two quizzes with the lowest grades will be dropped. If you miss up to two quizzes, for example, it will not affect your quiz grades, as you only need 10. However, your chances for a stellar grade improve with each quiz and you are more likely to receive a better grade if you complete all 12 quizzes. Therefore, plan to participate in class as much as you can.

Desirable Questions for the Quizzes

- The point is not to create memorization questions. Try to be creative.
- You can’t create two questions about the same specific topic.
- You cannot create true or false questions, unless you make a false statement and ask why it is wrong and how to correct it.
- If a question is multiple choice, it has to have at least four options.
- Questions that correlate daily life with the topic taught in class are highly encouraged.

Tests: About 50% of the questions you and your classmates create will be used in the midterm and final exam. Students will first take the test individually (worth 60% of the total points in the test). Then individual tests will be collected, and a new sheet with the same questions will be distributed to each student. This time they will be asked to answer to the same questions in groups, and this test score will be worth 30% of the total test grade. This part will be distributed for the last 30 minutes of class or right after all the last students finish the first part. For the remaining 10% of the test, students will be asked to individually write a reflection about the test method used by answering a few questions, such as”

1. What did you think about doing the test individually as compared to in a group?
2. Did you learn anything from your colleagues that was not clear before?
3. Did you find it faster to do the test in a group than by yourself? If yes, why? Etc.

There are no right or wrong answers for this part. As long as you write something that is truthful and understandable to whoever reads it, you will receive 10% on the test.

Participation: There will be multiple opportunities for participation in class throughout the semester in addition to regular questions and comments made by students during classes. Some examples of other participation activities are a one-minute paper, where students will have the opportunity to write down questions and feedback, jigsaw, where students will work in groups to learn a specific subject and then share with the other students, communicating errors in the syllabus (broken links and others) to the instructor/TA, etc.

Extra Credit: There are 6 extra credit points built into the course (6%) distributed in 2 extra quizzes. These extra quiz points allow you the flexibility to “make up” missed
quiz or test points by doing the four additional quizzes. There will, however, be no “individual” extra credit opportunities offered; the only extra credit offered will be from assignments available to the entire class.
# 2. Weekly Course Schedule

<table>
<thead>
<tr>
<th>Week/ Date</th>
<th>Activity</th>
<th>Topic/Assignment (Question/Subject)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1</td>
<td>Topic</td>
<td>Introductions&lt;br&gt;Geologic time and the Human Speck&lt;br&gt;Organic molecules: life’s building blocks</td>

III. Grading

3. Statement on Attendance and Participation

Attendance and Participation: Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at: https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/

Disability Accommodations: are made as soon as possible upon receipt of an accommodation letter from the Disability Resource Center https://disability.ufl.edu/students/get-started/. If you are submitting a letter, it is your responsibility to communicate which specific accommodations you will need in order to fully participate in the course. We are more than happy to provide accommodations so that every student can get the most out of this course, but we rely on you to communicate your needs in a timely manner so that we may meet them fairly and appropriately. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Academic Integrity standards will be upheld vigilantly at all times in this class. Upon registering at the University of Florida, you signed the following statement: “I understand that the University of Florida expects its students to be honest in all their academic work. I agree to adhere to this commitment to academic honesty and understand that my failure to comply with this commitment may result in disciplinary action up to and including expulsion from the University.” On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied:

"On my honor, I have neither given nor received unauthorized aid in doing this assignment." You will be expected to keep these commitments in every aspect of your participation in this class.

4. Grading Scale

IV. Learning Experiences

5. This Course’s Student Learning Outcomes (SLOs)

**By the end of this course, you should be able to:**

- Explain how life appeared on the planet and what environmental conditions were necessary for its appearance;
- describe the progression of life forms on Earth and explain how environmental pressures affect populations of living organisms;
- explain the value of plants to human beings and describe the impacts that the development of agriculture and the use of fossil fuels have had on human populations and societies;
- discuss the effects of biological resource limitations on major historical events and cultural trends;
- distinguish between density-independent and crowd diseases, and describe how various diseases have affected humans and their civilizations;
- give examples of human activities that have led to increases in human, animal, and plant diseases.
V. Required Policies

6. Attendance Policy
This class is 100% in-person; therefore, students are expected to be physically present in the classroom. For most of the classes, we will have collaborative work and active learning activities, where students will be graded for participating in groups. For that reason, students are encouraged to only miss class if they have a justifiable reason (if they get sick, accident, etc).

7. UF Evaluations Process
Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluerca.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

8. University Honesty Policy
UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code.” On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

9. Counseling and Wellness Center
UF Counseling Services provides resources on campus for students having difficulties which may interfere with their academic performance. Programs are available for general therapy, stress management, anger management, math confidence, career counseling, LGBTQ support, and many other specific needs. Resources available to you include:
1) **University Counseling Center**, 301 Peabody Hall, 392-1575  
2) **Student Mental Health Center**, 392-1171  
3) **Sexual Assault Recovery Services (SARS)**, **Student Health Care Center**, 392-1161  
4) **Career Resource Center**, Reitz Union, 392-1601

10. **The Writing Studio**

The writing studio is committed to helping University of Florida students meet their academic and professional goals by becoming better writers. Visit the writing studio online at [http://writing.ufl.edu/writing-studio/](http://writing.ufl.edu/writing-studio/) or in 2215 Turlington Hall for one-on-one consultations and workshops.

11. **Software Use and Copyright**

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

12. **Recording Policy**

Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted
by a person injured by the publication and/or discipline under UF Regulation 4.040
Student Honor Code and Student Conduct Code.

VI. Contacting the Instructor

13. Individual Questions, Problems, or Appointments

Please use the email function in Canvas to communicate with the instructor and TA
during the semester, rather than regular university email, except in extreme
emergencies. Email delivered on weekdays (M-F) will generally receive a reply
within two business days. Messages may not be checked between 5:00 pm Friday and
8:00 am Monday; messages received over the weekend will generally receive a
response on Monday. If I plan to be out of the office or otherwise unavailable, I will
post an announcement on Canvas.

14. Canvas Technology Requirements & Technical Support

Computers, Internet, and Web browsers: Canvas runs on Windows, Mac, Linux, iOS,
Android, or any other device with a modern web browser. It is recommended to use
a computer less than five years old with at least 1GB of RAM. It is recommended to
have a minimum Internet speed of 512kbps.

Canvas currently supports the following browsers: Chrome, Safari, Firefox, Edge.
Canvas supports the last two versions of most browsers. It is highly recommend
updating to the newest version of whatever browser you are using. Note that your
computer’s operating system may affect browser function. Failure to use one of these
browsers will cause problems.

For more information on approved computers and browsers please visit:
https://community.canvaslms.com/t5/Canvas-Basics-Guide/What-are-the-browser-and-computer-requirements-for-Canvas/ta-p/66 On this web page there is an area
titled “Is My Browser up to Date?” Use it to check each computer and browser you
may use in this course. There is another important area on “Browser Privacy Settings.”
Read the section(s) for any browser intended for use. For example, Note that: In
browsers such as Safari, insecure content will never be displayed in the browser.
Return to the page to check for updates on technology issues in Canvas.

If you encounter technical difficulties in this course, contact the UF Computing Help
Desk right away to troubleshoot. https://helpdesk.ufl.edu/ or (352) 392-HELP. If the
problem cannot be fixed immediately, notify your instructor, and provide them with
the Help Desk ticket number and a description of the problem and steps taken to
resolve it.
